

User Stories & Acceptance Criteria

Smart Digital Platform to Promote Eco & Cultural Tourism in Jharkhand

EPIC	USER STORY	ACCEPTANCE CRITERIA
As a Tourist, I want to register or log in securely so that I can access personalised features such as bookings, saved destinations, and feedback. Source: Register / Log In	As a new Tourist, I need to create an account with my name, email, phone number, and password so that I can start using the platform.	Ensure the Tourist is able to: - enter name, email, phone number, and password - have the system validate unique email and password strength - have an account created and a session started - be redirected to the home screen after registration
	As a returning Tourist, I need to log in with my email and password so that I can access my existing bookings and profile.	Ensure the Tourist is able to: - enter email and password to authenticate - be shown an error and allowed to retry on incorrect credentials - have the account temporarily locked after five failed attempts, with an email notification - reach the home screen once authenticated
As a Tourist, I want to search and explore tourist destinations so that I can decide where to visit and what to book. Source: Search Tourist Destination	As a Tourist, I need to search destinations by name, district, category, activity, or keyword so that I can find places that match my interests.	Ensure the Tourist is able to: - choose a search method (name, category, location, or keyword) - view a list of matching destinations - select a destination from the results
	As a Tourist, I need to view full destination details so that I can decide whether to book or save it.	Ensure the Tourist is able to: - view description, images, and maps for the destination - view transportation, nearby attractions, and accommodation information - save the destination or proceed to booking
As a Tourist, I want to book and pay for tourism services so that I can confirm my travel plans with a verified provider. Source: Create Booking / Make Payment	As a Tourist, I need to book a guide, homestay, or transport service for a chosen destination so that I can reserve a service for my visit date.	Ensure the Tourist is able to: - view available dates and provider options for the destination - confirm the visit date and service details - have a Booking record created with status Pending - be notified once the Booking status changes to Confirmed

EPIC	USER STORY	ACCEPTANCE CRITERIA
As a Tourist, I want personalised itinerary suggestions and a way to give feedback so that my trips are tailored to my interests and future visitors benefit from my experience. Source: Request Personalized Itinerary / Submit Feedback	<i>As a Tourist, I need to request an AI-generated itinerary based on my interests, duration, and budget so that I can plan my trip without researching everything myself.</i>	Ensure the Tourist is able to: - specify interests (eco-tourism, adventure, pilgrimage, tribal culture, wildlife, heritage), duration, and budget - view a generated itinerary with linked destinations and providers - adjust preferences and regenerate the itinerary - save the itinerary or convert legs of it directly into Bookings
	<i>As a Tourist, I need to submit a rating and comments after a completed visit so that I can share my experience and help improve tourism services.</i>	Ensure the Tourist is able to: - submit feedback for a completed Booking - provide a rating (1-5) and written comments - have the feedback stored and linked to the Booking and Destination - receive a confirmation notification after submission
As a Local Service Provider, I want to register and manage my tourism service on the platform so that I can reach tourists and receive bookings. Source: Register Tourism Service	<i>As a Local Service Provider, I need to register a new service with my business details and supporting documents so that my listing can be reviewed and verified.</i>	Ensure the Local Service Provider is able to: - enter name, business type, contact information, and location - upload required government identification and supporting documents - have mandatory fields validated before submission - receive an acknowledgement notification once submitted
	<i>As a Local Service Provider, I need to update my existing service details so that my listing stays accurate for tourists and administrators.</i>	Ensure the Local Service Provider is able to: - open and edit an existing service record - update contact information, location, and documents - have changes validated and saved - keep the existing Verification_Status unchanged after an edit
As a Tourism Administrator, I want to verify service providers and manage destination information so that only accurate, trustworthy	<i>As a Tourism Administrator, I need to review and approve or reject pending service provider applications so that only verified providers are visible on the platform.</i>	Ensure the Tourism Administrator is able to: - view a list of pending verification requests - review submitted documents for each provider - approve or reject the application

EPIC	USER STORY	ACCEPTANCE CRITERIA
listings are visible to tourists. <i>Source: Verify Service Provider / Add-Update Destination Information</i>	<i>As a Tourism Administrator, I need to add or update tourist destination information so that tourists always see current and accurate destination details.</i>	- have an approval written to the Verification Ledger and the provider marked Verified Ensure the Tourism Administrator is able to: - add a new destination with details, images, maps, and category - select and edit an existing destination in an editable form - have mandatory fields validated before saving - have changes recorded with the date and time of modification
As a Tourism Administrator, I want to review tourist feedback and send event notifications so that I can act on visitor input and keep tourists informed. <i>Source: Process Tourist Feedback / Send Event Notification</i>	<i>As a Tourism Administrator, I need to view tourist ratings, comments, and sentiment analysis results so that I can identify service improvements and follow up where needed.</i>	Ensure the Tourism Administrator is able to: - open the feedback module and view ratings, comments, and sentiment results - review feedback linked to a specific Booking and Destination - record follow-up actions - update the feedback record's status
	<i>As a Tourism Administrator, I need to send notifications about festivals, fairs, and tourism events so that tourists stay informed about relevant activities.</i>	Ensure the Tourism Administrator is able to: - select an event and retrieve its details - confirm and send the notification to relevant users - have the notification sent to all interested users if no specific targets are selected - view the updated notification history
As a Government Official, I want a read-only tourism analytics dashboard so that I can monitor tourism growth and platform performance without administrative edit rights. <i>Source: View Tourism Analytics (Read-Only)</i>	<i>As a Government Official, I need to view aggregated visitor statistics, booking trends, and revenue trends so that I can track tourism performance across Jharkhand without accessing personal tourist data.</i>	Ensure the Government Official is able to: - log in with a read-only role - view an analytics dashboard filtered to aggregate, non-personally-identifiable statistics - filter results by district, category, or date range - view updated results after filtering, with no edit access anywhere on the dashboard
